From: Select Health Bright Start Maternity Program
Date: March 1, 2022
Subject: Electric Breast Pumps for Expectant and New Moms!

Summary: Select Health is pleased to announce a **new enhanced benefit for First Choice plan members***. In partnership with Aeroflow Healthcare, we are now offering **electric breast pumps for eligible expectant and new moms**. Aeroflow has dedicated specialists to assist with ordering, answering questions, checking eligibility, and working with our OB/GYN providers to obtain the necessary prescription on the member's behalf.

How does this work?

The member contacts Aeroflow directly, either by visiting their website or via phone, to begin the process to request their electric breast pump:

- Website: aeroflowbreastpumps.com
- Phone: 1-844-867-9890

Aeroflow will work with the member to verify coverage and submit required paperwork.

What this means for providers:

Aeroflow will contact the member's OB/GYN to obtain the prescription. Providers are asked to complete the *Written Order for Breast Pump* form once they receive a faxed request from Aeroflow.

For questions:

Please contact Aeroflow directly at the number listed above if you have questions or would like more details. Also, please see the attached flyer for the latest information on all the extra benefits we offer to our First Choice members.

Select Health is proud to work in partnership with Aeroflow and you, our valued OB/GYN providers, to provide electric breast pumps for our expectant and new moms. Thank you for helping share the good news with your patients who may benefit and facilitating this new benefit by providing the required prescription.

*This benefit became effective January 1, 2022.
