

ALLOWABLE 90-Day Supply Medication

In 2013, Select Health of South Carolina initiated a pilot program to improve medication adherence in three key therapeutic treatment areas: hypertension, diabetes and high cholesterol.

Practitioners are encouraged to prescribe a 90-day prescription for members on medications that qualify for a 90-day supply.

New for 2015, we have updated the list of these medications to include some newly available generic drugs in these therapeutic categories. In addition, we are now allowing select asthma medication to process for a 90-day supply as part of this program.

Pharmacists are encouraged to work with providers to obtain a 90-day prescription for members on medications that qualify for the 90-day supply.

This program will benefit members by allowing them to obtain a three-month supply of medication at each pharmacy visit for only one copayment (if applicable).

Pharmacies will be given two dispensing fees for all 90-day prescriptions filled as part of this program.

Please contact Pharmacy Services if you have any questions or concerns about this initiative at 1.866.610.2773.

| Hypertension, Diabetes, High Cholesterol 90-day Supply Oral Drugs - Revised Aug. 2015 | | | |
